

STEDI-COIL™ Vibratory Conveyor Series 907

The Kraus STEDI-COIL™ Vibratory Conveyor is used to convey either sand and castings together or sand and castings separately. This design also uses an abrasion resistant and replaceable conveyor trough and incorporates a heated and fully insulated

trough to prevent sticky molding sand from adhering to the trough. Also included is a single but proven eccentric drive and a counterbalanced base to isolate the counteracting forces.

Dimensions and specifications subject to change without notice.
