

# L-Series Vibratory Pan Feeder - Pneumatic - Suspension Mounted

This air operated L-Series Vibratory Pan Feeder is suspension mounted. It has the ability to vary the normal flow rate by 100 to 1 ratio making it ideal for high accuracy weighing. Because it is all

air operated and uses air pressure and air volume for control, it does not need a motor starter or any high voltage electrical control, making it ideal for explosion-proof atmospheres.

Dimensions and specifications subject to change without notice.
