

Weighing and Batching System Series 915

This Weighing and Batching System uses multiple L-Series Vibratory Feeders to feed individual ingredients onto one STEDI-FLO™ Vibratory Feeder. The STEDI-FLO Vibratory Feeder is mounted on four load cells, one under each spring support leg. Individual ingredients are weighed in succession until the weighed batch is complete. All L-Series

Vibratory Feeders are pneumatic powered, and have multiple slow speeds, as desired, to obtain the highest accuracy of ingredient weight possible. When a batch is complete, all materials are conveyed on the STEDI-FLO Vibratory Feeder to a single destination point.

Dimensions and specifications subject to change without notice.
